

## **PRESS RELEASE**

### **MINISTRY OF ENERGY TRANSITION & WATER TRANSFORMATION (PETRA)**

#### **CROSS-BORDER GREEN ELECTRICITY TRADE FROM MALAYSIA TO SINGAPORE CONTINUES WITH THE LAUNCHING OF ENEGEM AUCTION 2025**

**PUTRAJAYA**, 5 September 2025 – In line with the nation’s energy transition commitment and the aspiration to realise regional electricity supply integration, the Ministry of Energy Transition and Water Transformation (PETRA) will continue the implementation of cross-border green electricity trade. This effort will be carried out through the Energy Exchange Malaysia (ENEGEM) Auction 2025 bidding, which enables the sales of green electricity from Malaysia’s power supply system to Singapore.

The ENEGEM is a dedicated platform established by PETRA on 15 April 2024 to facilitate cross-border green electricity trade with neighbouring countries. The cross-border energy trading through the ENEGEM is implemented based on the “Guide for Cross-Border Electricity Sales (CBES)”. To date, green electricity trade transactions with a capacity of up to 50MW have been delivered since 13 December 2024.

In support of the progressive implementation of cross-border electricity trade in the forthcoming years, PETRA invites interested parties who are electricity generation, retailer or wholesaler licensee in Singapore to participate in the ENEGEM Auction 2025 for the purchase of green electricity from Malaysia for supply to consumers in Singapore. Parties intending to participate may register their interest through the Single Buyer’s website from 8 September 2025. Further information on the

upcoming auction is available on the official websites of PETRA, the Energy Commission, and the Single Buyer.

PETRA is confident that the implementation of bidding through the ENEGEM platform will enable Malaysia to further strengthen the framework for cross-border electricity supply, while opening up wider opportunities for development and collaboration in the green energy sector through cross-border trade among ASEAN countries, in line with Malaysia MADANI core values of prosperity and sustainability.
